

Fraud Audit Summary — July 2025

AI-powered risk monitoring results, flagged accounts, fraud patterns detected, actions taken, and system performance for July 2025.

ALERTS RAISED	HIGH RISK	RESOLVED	PENDING REVIEW
19	4	11	8

High-Risk Account Detail

Account	Email	Risk Score	Trigger Flags	Status	Flagged
u_9284	xander.vm@proton.me	92%	VPN, Payment fail x4, Proposal spam	Pending	Jul 14
u_4471	liona.rc@tempmail.com	76%	Duplicate identity, Multi-IP	Reviewing	Jul 13
u_8812	bot.trader@fastmail.com	82%	Automated proposals, No KYC	Suspended	Jul 07
u_3309	anon.flip@inbox.lv	61%	Fake portfolio, Rapid role switch	Warned	Jul 05

Fraud Pattern Analysis

The AI monitoring system processed 142,000 platform events in July. Key fraud vectors identified this month:

VPN / Proxy Usage

38% of flagged accounts used anonymising proxies. Cross-referenced against known VPN IP ranges.

Proposal Spam

Accounts submitting 20+ proposals within 24 hours of registration were auto-flagged for manual review.

Identity Duplication

3 cases of likely duplicate accounts detected via device fingerprinting and behavioural similarity scoring.

Payment Method Cycling

Repeated payment failures followed by new card attempts triggered fraud score escalation on 4 accounts.

Automated Bid Patterns

Bot-like proposal timing (< 90 seconds after posting) flagged 2 accounts for behavioural analysis.

Risk Score Distribution — July 2025

Actions Taken

Action	Count	Notes
Account Suspended	2	Permanent ban; payment refunded where applicable
Account Warned	4	Formal warning issued; activity monitored 30 days
Monitoring Increased	5	Enhanced event logging; proposal rate limited
Cleared — False Positive	8	Manual review confirmed legitimate activity

System Performance

AI fraud model accuracy (precision): 91.3%. False positive rate: 42.1% (improving — model retrained Jul 8). Average time from event trigger to admin alert: 1.8 minutes. Next model retrain scheduled: Aug 1, 2025.
